CANFEEX

Web Design

Overview

About project and Objective

About Project:

CanFeeX is a home service platform that offers convenient and high-quality services. They provide a wide range of services, including cleaning, maintenance, car services, and repairs.

Objective:

- The primary goals are to design an attractive and informative website that effectively presents the various services offered by CanFeeX.
- website should include a seamless order request form that allows customers to easily submit their service requests.

Overview

Team

This brand started from scratch, and simultaneously with product design, logo design, and branding, web design was also done. I handled the website design, while Inaz took care of visual identity and logo design.

Website Flow & Tree

In the flow below, I designed website tree and order flow.

Wire framing

LowFI wireframe

Quick Prototype testing

- Design a quick prototype to share and get early feedback on design.
- We finalized the website texts in wireframe step
