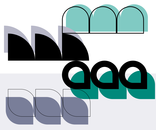
VANDAR PRODUCT ICONS

Icon Design



Overview

About project and Objective

About Project:

Vandar, a B2B platform for payments and money management, underwent a complete redesign after three years.

A refreshed logo and custom icon set aligned with the brand's modern aesthetic, enhancing clarity, usability, and memorability across the platform and marketing materials.

Objective:

- Created a custom icon set aligned with the platform's branding and functionality.
- Ensured consistency in design to enhance clarity and reduce cognitive load.
- Designed icons to be versatile for use in both the platform and marketing materials.
- Focused on making the icon set memorable and visually impactful.

Overview

Previous design

disadvantages:

- Lacks consistency across the design of the icon set.
- Relies on generic financial elements without meaningful symbolism.
- Shows little creativity or innovation in the design approach.

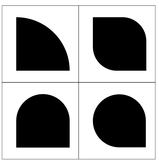
Ideate

Sketch

My idea was to think outside the box and avoid using images and elements similar to bank cards and money, instead opting for more creative concepts.

Skeleton

Principle



Icons serve as visual representations of our tools and services, making it crucial for them to align with our visual identity and maintain consistency. To achieve this, we use specific shapes in our icons. The chosen shape is a square with varying curves on each side, which helps create a distinctive and cohesive design that reinforces our brand's identity.

Skeleton

Key line shape

This shape is our keyline shape and all the icons should fit to this shape.

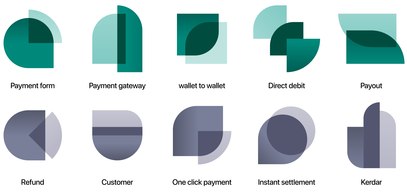
Outcome

Product Icons



Outcome

Website

This icon set served as the foundation for the redesign concepts of the Vandar website, particularly for the payment gateway page. As an example, I'll share the sample page here.

The product icons are featured in the hero section and have the potential to be seamlessly integrated with the new images on the website, enhancing the overall visual appeal and consistency.
